*Find new songs. Licence clearly.
Perform with confidence.*

For Artists, Singers & Performers

1 Why MusiBee4?

MusiBee4 gives artists a clearer and more professional way to discover new original songs from songwriters around the world. Instead of relying on casual messages, email attachments or unclear promises, you can view song listings, hear previews and understand what is being offered.

2 What artists gain

- A safer way to discover new original songs
- A clearer licence trail
- Locked song versions, so you know exactly what you are using
- A direct route to enquire about or licence the song
- A stronger evidence trail showing what was offered, by whom, and when
- A more professional alternative to informal song sharing

3 How it helps protect performers

When a song is licensed through MusiBee4, the performer has a stronger record showing what they were given permission to use, which version they licensed, and who offered it. This helps reduce confusion and lowers the risks that come from using songs shared casually by email, message or social media.

4 Why version lock matters

If the songwriter later changes the lyrics, uploads a new demo or creates a revised version, that new version can receive its own proof record. Your licence remains connected to the version you actually licensed.

5

Why this is safer than random file sharing

No vague promises

No confusion over which version was sent

No relying only on old messages or attachments

6 Important to know

MusiBee4 cannot promise that nobody will ever make a claim. No platform can honestly promise that. What MusiBee4 does is reduce confusion by keeping the song, creator, version, licence route and evidence trail together in one place.

7 Proof & permission trail

MusiBee4 helps show what song was listed, what version was made available, what rights were being offered, and how the artist obtained permission to use it.

Song

Version locked

Licence obtained

Evidence trail

**A clearer permission trail.
A safer path to new music.**
